JVS AIR SYSTEMS

# "Beat the Heat and Be Cool with JVS"

## COMPANY PROFILE

JVS Air Systems is one of the fastest growing multifaceted turnkey HVAC contracting company in Tamil Nadu. Started in 2010 by a group of well experienced and qualified professionals having more than a decade of experience in Sales, Design, Planning, Execution and Servicing of variety of HVAC equipments & projects. Our core team has immense knowledge and expertise in the field of Heating, Ventilation and Air Conditioning Systems.

We are one of the dynamic channel partners of Blue Star. They offers one of India's widest range of air conditioning and commercial refrigeration products.

### OUR MISSION

To provide simple and contemporary HVAC solutions and to exceed the customer expectation in terms of quality and timely completion of the project and by setting example for others to follow.

### OUR VISION

To attain no.1 position in terms of customer satisfaction and turnover by providing innovative solutions at affordable cost.

# OUR SERVICES

Our solution spectrum includes:

- Building and fit out HVAC turnkey works like ducting, piping, equipment installation and commissioning.
- Sales, Execution and Servicing of Blue Star Products
- Retrofit and reinstallation of any HVAC-related works.
- Annual Maintenance Contract (AMC) and On-Call Service of any HVAC installation including Packaged/ductable split units, VRF systems & Central plants.

# Why JVS?

Understands the core issue of the problem through detailed discussions as we believe that a "Fully understood question solves half the problem".

Comprehensive solutions for all range of air conditioning systems like Ductable Split & Packaged units, VRF units AHUs and Central plants.

We select the products or solutions based on the specific requirement and needs of the customers. The selling is based on, 'what client needs rather than what we have?'

Carry out cooling load calculation based on the actual site conditions to arrive at the exact capacity of equipments required.

We just don't stop with commissioning and handing over but we make sure you will enjoy the utmost pleasure through our systems.

# INFRASTRUCTURE

- Equipments for HVAC load calculations and state-of-the-art equipments for the project design and execution
- In-house design team for duct designing (both for air conditioning and ventilation applications), piping designs for DX units and chill water piping systems.
- In-house planning team for requirement of materials and buying it from the authorized distributors/dealers , direct manufacturers wherever possible.
- Perfect process mechanism in place to ensure timely execution of projects in synergy with planning and service teams.
- Own service team with wide range of modern tools to handle commissioning activities and after sales service
- An exclusive service team headed by a Service Manager handles Annual Maintenance Contracts (AMC). We also undertake AMC of all types of HVAC systems including Commercial and Industrial Segments like Ductable Split & Packaged Systems, VRF and Central Plant Systems.

We have the following in-house departments to serve our customers

- Sales and Marketing
- Designing
- Planning and Purchase
- Execution and Quality Control
- Service Team taking care of commissioning, handing over and after sales service including AMC and On-Call Services
- Environmental, Health and Safety (EHS )
